

RFID Attendance System User Manual

I. Introduction

Welcome to the RFID Attendance System user manual. This guide is designed to help you effectively use our system to track attendance using RFID technology.

II. System Overview

The RFID Attendance System comprises both hardware (RFID readers) and software. It utilizes RFID technology to track attendance efficiently.

III. Logging In

To begin using the system, follow these steps:

RFID ATTENDANCE SYSTEM

Username

Password

College of Saint Lawrence Inc.

Borol, 1st, Balagtas, Bulacan

Login as administrator, this is the default username and password of 2 accounts. We only have 2 accounts for this system.

Account 1:

Username: admin

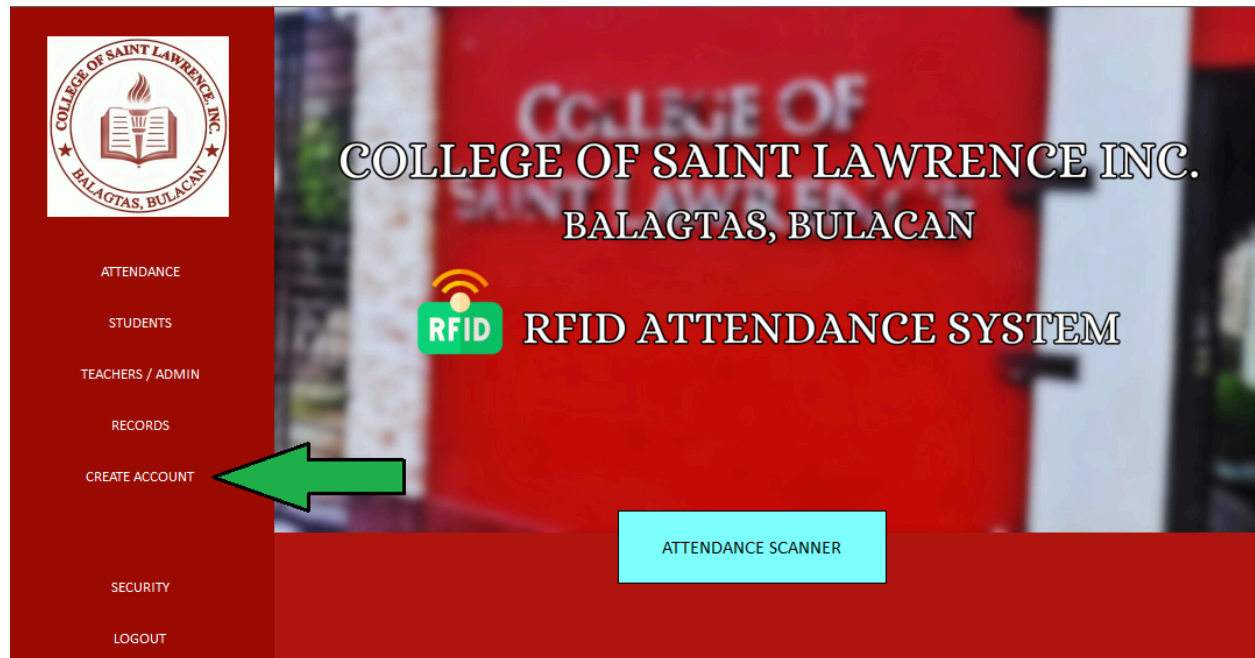

Password: password

Account 2:

Username: admin2

Password: password

III. Creating a Student and Admin Accounts

The 'CREATE ACCOUNT' form is displayed within a window titled '+ CREATE ACCOUNT'. It features the same sidebar as the main interface. The form fields include: 'RFID NO.' (text input), 'SCHOOL ROLE' (radio buttons for 'Student' and 'Teacher / Admin'), 'STUDENT ID' (text input), 'FIRST NAME' (text input), 'LAST NAME' (text input), 'YEAR LEVEL' (dropdown menu), 'COURSE' (dropdown menu), and 'SECTION' (dropdown menu with a note '(Leave it blank if not applicable.)'). Below the profile picture placeholder are 'BROWSE' and 'CLEAR IMAGE' buttons. At the bottom are 'Settings' and 'SUBMIT' buttons.

Just provide the required information to set up an account, enabling access to the attendance system.

In the Record section, administrators can access all attendance records from the school. It displays essential information such as name, year level, course, section, status, date, time in, time out, and duration. Various search and filter options are available to easily see the needed data. Additionally, administrators can export attendance records to Excel and delete individual records as needed.

VIII. Export Attendance Data

 **EXPORT ATTENDANCE** 

Filter the data you want to export by specifying the desired criteria.
[Leaving the filter criteria empty will result in exporting all records listed in the database.](#)

Role
☒ Student ☐ Teacher/Admin

Year level

Course

Section

Time
☒ By time range ☐ By specific year
Time range

In the Record section, you'll find an 'Export' button which will open the export form. This form offers various filters to export the required data from the system. Leaving the filters empty will export all attendance data from the system. You will find the Excel file in the 'Documents' folder.

IX. Delete Attendance Data

 **DELETE RECORD** 

Time range

Year older than

In the Record section, you'll find a 'Delete' button, which opens the delete form. Administrators have the privilege to delete records for specific reasons. They can choose from options such as 'Today', 'This Week', 'This Month', or 'All Time', and they can also delete records older than a specific year.

X. Create Account Settings

 SETTINGS 

COURSE

INSERT

DELETE

Insert

 Delete

Deleting a course will also remove associated data and connections. Please proceed with caution.

SECTION

CREATE NEW SECTION

in the course of

and year of

Insert

Before deleting a section please provide first the associated year and course of that section.

what year? (for deletion)

what course?

DELETE A SECTION

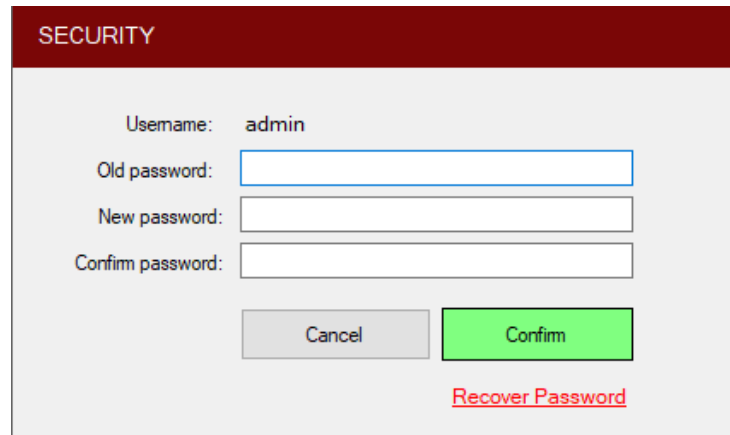

Please be advice the deletion of section include the associated data and connection.

Delete

In the Create Account section, you'll find a 'Settings' button that opens the settings form.

Administrators can use this form to add new courses and sections, as well as delete existing courses and sections. Please be guided that deleting a course or section also remove associated data and connections. It's best practice to export the data before deleting any records. Be caution when performing this action.

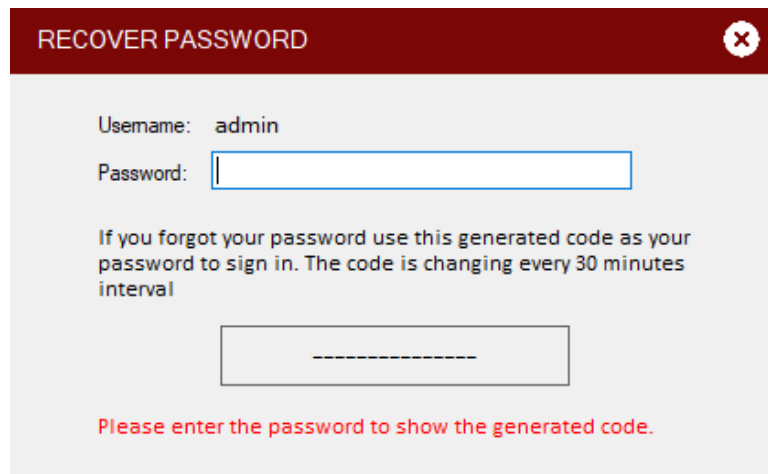

XI. Security

The screenshot shows a web form titled "SECURITY" in a dark red header. Below the header, the "Username:" field is pre-filled with "admin". There are three input fields for "Old password:", "New password:", and "Confirm password:". At the bottom, there are two buttons: a grey "Cancel" button and a green "Confirm" button. Below the buttons is a red text link that says "Recover Password".

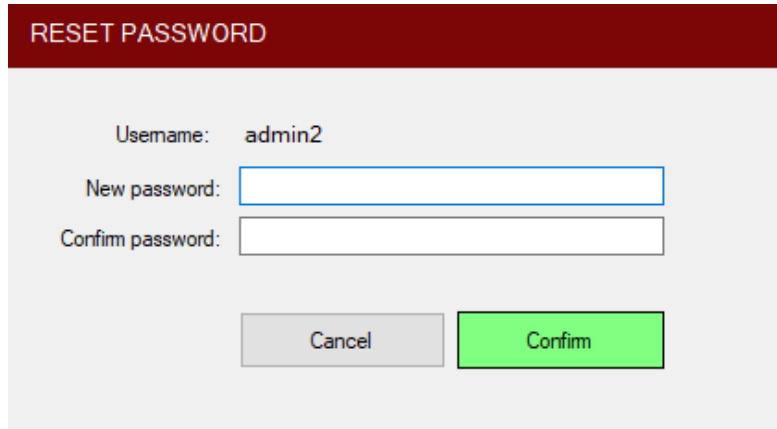

In the Security section, administrators can change their password by inserting the old password to validate their identity.

XII. Recover Password

The screenshot shows a web form titled "RECOVER PASSWORD" in a dark red header with a close button (X) in the top right corner. Below the header, the "Username:" field is pre-filled with "admin". There is a single input field for "Password:". Below the input field, there is a text instruction: "If you forgot your password use this generated code as your password to sign in. The code is changing every 30 minutes interval". Below this text is a rectangular box containing a dashed line "-----". At the bottom of the form, there is a red text instruction: "Please enter the password to show the generated code."

If an administrator forgets their account password (ex. admin2 account), Simple log in the other account (ex. admin account), navigate to the Security section, and click on the 'Recover Password' link. This action will open the password recovery form. After providing the password of the current account to validate their identity, a generated code will be displayed. Simply copy the code and use it as the password for the forgotten account.

A screenshot of a 'RESET PASSWORD' form. The form has a dark red header with the text 'RESET PASSWORD' in white. Below the header, the 'Username:' field is populated with 'admin2'. There are two empty text input fields for 'New password:' and 'Confirm password:'. At the bottom, there are two buttons: a grey 'Cancel' button and a green 'Confirm' button.

RESET PASSWORD

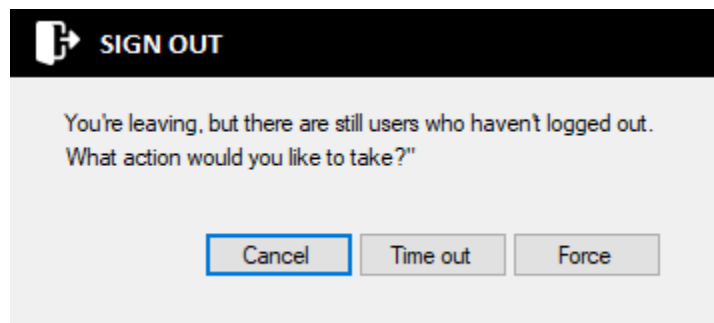

Username: admin2

New password:

Confirm password:

After opening the forgotten account using the generated code, this will open the reset password form, allowing the administrator to enter a new password for their account.

XIII. Logout

A screenshot of a 'SIGN OUT' dialog box. The dialog has a black header with a white icon of a person and the text 'SIGN OUT'. The main text area contains the message: 'You're leaving, but there are still users who haven't logged out. What action would you like to take?'. At the bottom, there are three buttons: 'Cancel', 'Time out', and 'Force'. The 'Cancel' button is highlighted with a blue border.

 SIGN OUT

You're leaving, but there are still users who haven't logged out.
What action would you like to take?"

When the administrator attempts to log out but there are students or teacher/admins who haven't yet logged out, a form will be displayed. The administrator can choose to take action for them, either timing them out or tagging them for a forced logout.

System Requirements:

Operating System: Windows 8.1 64-bit / Windows 10 Pro 64-bit

CPU: at least Intel Core i5 3rd @ 2.60Hz (4 CPUs) Gen and above

RAM: at least 2 GB and above

Hard Disk: at least 128 GB and above

Screen size: At least 5.6 inches and above

RFID Scanner Specification:

Working band: 125khz Proximity Sensor

Operating system: in XP\Win CE\Win 7\Win 10\LIUNIX\Vista\Android

Read card type: TK4001, EM4100, and other ID cards.

Read card distance: 0-80mm

Reading speed: < 100 mS (0.2 Sec)

Communication interface: USB

Working voltage: 5V

Working current: 100mA

Product size: (3.70 inches length * 2.36 inches width * 0.39 inches height)

Card size: 85.5 mm x 54 mm x 0.8 mm (L x W x D)

Status indicator: 2 color LED ("red" power LED, "green" status indicator)

Product weight: 33g

Package: 1 x Card Reader, 1 x 1.4m/4.5ft USB Cable, 5 x Keychain ID Cards, 5 x ID Cards

Price: 417 Pesos
